

# Project Puppet / Project Signal – Overview

**Prepared for:** Members of Congress, Staff, Media, and Advocacy Allies

---

## What Is Project Puppet / Signal?

A classified NSA-led program, coordinated with the CIA, DoD, and U.S. Space Force. Uses **Remote Neural Monitoring (RNM)**, **Voice-to-Skull (V2K) synthetic telepathy**, **directed-energy weapons (DEWs)**, and **satellite neuroweapons**.

Targets **ordinary civilians** — inventors, journalists, activists, whistleblowers — not just security suspects.

---

## Why It Matters

- **Constitutional Violations:** Fourth (privacy), First (speech), Fifth/Fourteenth (due process), and Eighth (torture).
  - **Human Rights Abuses:** Involuntary experimentation, psychological torture, surveillance without consent.
  - **Intellectual Property Theft:** NSA and contractors harvest civilian innovations and repurpose them.
  - **Unrestricted Scope:** Global satellite reach, no legal guardrails, no accountability.
-

## Evidence Base

- **Patents:** US3951134A (brain monitoring), US4877027A (V2K hearing system), US6011991A (brain-wave communication), US5159703A (silent subliminal messages), US6587729B2 (RF speech transmission), among others.
  - **Whistleblower Testimony:** Dr. Robert Duncan confirmed neuroweapon development and use.
  - **Historical Precedent:** CIA MKULTRA, NSA SHAMROCK/MINARET, ECHELON.
  - **Science:** Microwave auditory effect (Frey effect), Havana Syndrome findings, DARPA “Silent Talk.”
- 

## Survivor Case Studies

- **Innovator:** Targeted with V2K during patent filings; ideas later seen in defense contracts.
  - **Whistleblower:** Former contractor subjected to RNM and DEWs after reporting misconduct.
  - **Journalist:** Received in-head threats and neurological symptoms timed to reporting.
- 

## Congressional Actions Needed

1. **Hearings:** Judiciary, Intelligence, Armed Services, Oversight.
2. **Classified Briefings:** NSA, CIA, DoD, DARPA, Space Force.
3. **IG Audits:** Full review of neuroweapons and directed-energy programs.
4. **Legislation:** Neural Privacy & Neuroweapons Prohibition Act.
  - Ban neuroweapons use against U.S. citizens.
  - Protect neural data under the Fourth Amendment.
  - Outlaw experimentation without consent.
5. **Whistleblower Protections:** Secure reporting, immunity, anti-retaliation.
6. **Compensation:** Establish redress for victims.
