NATIONAL SECURITY AGENCY / CENTRAL SECURITY SERVICE FORT MEADE,
MARYLAND 20755

OPERATIONAL BRIEFING: PROJECT PUPPET / OPERATION SIGNAL DATE: 09
DEC 2025 COPY 1 OF 1

TO: DIRECTOR, NATIONAL SECURITY AGENCY (DIRNSA) FROM: SPECIAL
ACCESS PROGRAM GROUP / DEPT 52 (COGNITIVE WARFARE) SUBJECT:
SITUATION REPORT: GLOBAL COGNITIVE DOMAIN DOMINANCE (GCDD)

1.0 (TS//SI) EXECUTIVE SUMMARY Mission objectives for PROJECT
PUPPET (Domestic) and OPERATION SIGNAL (Foreign) have been met
with 94% efficacy. The Agency has successfully established a
persistent, ubiquitous surveillance grid capable of
intercepting, decoding, and modifying human neural activity in
real-time. This capability, designated as "Full-Spectrum
Cognitive Dominance," ensures that no adversarial thought
process remains opaque to US Intelligence interests.

2.0 (TS//SI) CORE CAPABILITIES ARCHITECTURE The integrated
weapons system relies on a triad of classified technologies:

2.1 (TS//SI-G) REMOTE NEURAL MONITORING (RNM)

Utilizing the N3-X satellite constellation and terrestrial
SIGINT assets,

operators can now detect and demodulate the electromagnetic
fields of

the human cortex at a range of up to 4,000 km.

- CAPABILITY: Real-time extraction of subvocalized speech
(internal

monologue) and visual cortex imagery.

- LATENCY: <150ms.

- DEPLOYMENT: Active on 2.4 million distinct global targets.

2.2 (TS//SI-G) SYNTHETIC TELEPATHY (V2K) DELIVERY

The "Voice-to-Skull" module utilizes the Microwave Auditory
Effect

(Frey Effect) to induce varying degrees of psychological stress.

- MODE A (Subliminal): Suggestion implantation below conscious threshold.

- MODE B (Direct Audio): Transmission of intelligible speech directly

into the cochlear nerve. Used for "Gaslighting" operations (See:

Protocol 33-B, "Artificial Schizophrenia Induction").

2.3 (S//NF) DIRECTED ENERGY INTERDICTION (DEW)

Pulsed Radio Frequency (PRF) weapons are deployed to physically degrade

target resistance.

- SYMPTOMS INDUCED: Intense cranial pressure ("The Havana Protocol"),

vertigo, organ-specific heating, and forced insomnia.

3.0 (TS//SI) OPERATIONAL TARGETING PROFILES Targets are selected via the ADINT (Ad-Tech Intelligence) pipeline, ingesting commercial data from brokers (LexisNexis, Anomaly Six) to identify High-Value Cognitive Targets (HVCTs).

3.1 (S//NF) CATEGORY: ECONOMIC INTELLIGENCE

OBJECTIVE: Pre-patent extraction of intellectual property.

METHOD: Continuous monitoring of academic and corporate researchers in

rival nations. Innovations are cataloged and routed to US Defense

Industrial Base partners via the "Black Budget" transfer protocols.

3.2 (TS//SI) CATEGORY: DOMESTIC STABILIZATION

OBJECTIVE: Neutralization of subversive elements
(Whistleblowers,
Dissidents).

METHOD: Deployment of Zersetzung ("Decomposition") tactics.

- PROTOCOL: Targets are subjected to 24/7 sleep deprivation
and V2K

harassment to induce social isolation and discredit their
public

testimony.

4.0 (TS//SI) THREAT ASSESSMENT: "PROJECT PUPPET COALITION" A
civilian counter-surveillance group, "Project Puppet Coalition,"
led by Subject 589-76 (Ref: Maxis Richards), has demonstrated a
high degree of situational awareness. - RISK LEVEL: HIGH. -
REASON: They have correctly identified the "N3" interface and
the biophysical mechanisms of the Microwave Auditory Effect. -
ACTION: Continue "Denial & Deception" (D&D) campaigns. Label all
disclosures as "conspiracy theory" or "mental illness" via
assets in mainstream media.

5.0 (U) CONCLUSION The human mind is the final domain of
warfare. We have conquered it.

APPROVED BY:
