INTELLIGENCE MEMORANDUM: PROJECT PUPPET / GLOBAL DISPOSITION MATRIX
DATE: 12 JAN 2026
SUBJECT: REGIONAL NEURAL THREAT ASSESSMENT & EXPLOITATION STATUS

1.0 (TS//SI) MISSION OVERVIEW

The Global Cognitive Disposition Matrix (GCDM), the primary intelligence

product of PROJECT PUPPET, continues to provide unparalleled insight into

the intentions and decision-making processes of Tier-1 foreign leadership.

PROJECT PUPPET collection efficacy remains stable at 88% globally, despite

increasing countermeasures by peer adversaries.

2.0 (TS//SI) REGIONAL ANALYSIS: EURASIA (RUSSIA)

OPERATION: RED ECHO (SUB-ROUTINE OF PROJECT PUPPET)

TARGET SET: Kremlin Inner Circle / General Staff

2.1 (S//NF) STATUS

Cognitive telemetry captured by PROJECT PUPPET sensors indicates severe

stress markers and erratic neural firing patterns within the [REDACTED]

command structure.

2.2 (TS//SI) EXPLOITATION

We have successfully amplified "paranoia loops" within the target

demographic. This has resulted in the dismissal of three competent

generals, degrading their operational readiness.

- SUCCESS: The "Ghost Signal" protocol was deployed during the Crimea

inspections, inducing acute confusion and fatigue in the visiting

delegation.

3.0 (TS//SI) REGIONAL ANALYSIS: INDO-PACIFIC (CHINA)

OPERATION: DRAGON GLASS

TARGET SET: PLA Unit 61398 / Shenzhen Tech Sector

3.1 (S//NF) COUNTERMEASURES DETECTED

The PLA has begun constructing expansive subterranean facilities in

Xinjiang encased in superconducting mu-metal shielding. This "Cognitive

Bunker" strategy has reduced PROJECT PUPPET signal penetration by 40%

in key sectors.

3.2 (TS//SI) ECONOMIC ESPIONAGE

Despite shielding, PROJECT PUPPET algorithms successfully intercepted

the "Alpha-State" visualizations of lead researchers at [REDACTED]

Semiconductor.

- YIELD: Blueprints for their next-gen quantum lattice were decoded

from the Chief Engineer's visual cortex during his unshielded commute.

Data has been forwarded to US commercial partners.

4.0 (TS//SI) REGIONAL ANALYSIS: EUROPE (NATO ALLIES)

OPERATION: VELVET GLOVE

TARGET SET: EU Trade Commission / Energy Ministers (Germany, France)

4.1 (TS//SI) DIPLOMATIC MANIPULATION

During the Brussels Trade Summit, the "Subliminal Compliance" algorithm

was actively broadcast to the EU negotiation team.

- RESULT: The targets exhibited higher localized anxiety when considering protectionist policies, leading to a favorable vote for

US interests.

4.2 (S//NF) INDUSTRIAL MONITORING

Routine PROJECT PUPPET sweeps of Airbus and Siemens engineering

divisions continue. We are cataloging all propulsion breakthroughs 18

months prior to their public patent filings.

5.0 (TS//SI) EMERGING THREATS

Israeli Unit 8200 has been detected probing the PROJECT PUPPET uplink

frequencies. It is assessed they are attempting to reverse-engineer our

carrier wave. Recommendation: Deploy "Neural Feedback" deterrent against

their Tel Aviv listening station.

6.0 (U) SUMMARY

PROJECT PUPPET ensures that the United States maintains decision superiority before the adversary has even formulated a conscious thought.
