JOINT SPECIAL OPERATIONS COMMAND (JSOC) / DOMESTIC ACTIVITIES DIVISION
PROJECT PUPPET / FIELD OPERATIONS GROUP
SITUATION REPORT: SECTOR 4 (CIVILIAN INTERDICTION)

OPERATIONAL LOG: TARGET ISOLATION & SYNCHRONICITY PROTOCOLS

DATE: 23 AUG 2023

SUBJECT: DEPLOYMENT OF "STREET THEATER" ASSETS AGAINST TARGET 902-B

1.0 (TS//SI) OPERATIONAL OBJECTIVE

To induce a state of "Hyper-Vigilance" and paranoia in TARGET 902-B

(Ref: "The Journalist") prior to their scheduled meeting with legal counsel.

The goal is to render the target's testimony incoherent and emotionally unstable.

2.0 (S//NF) TACTICAL DEPLOYMENT (0800 - 1800 HOURS)

2.1 (S//NF) PHASE 1: NOISE CAMPAIGN

- 0815: Asset Team Alpha initiated "Leaf Blower Protocol" adjacent to

Target's residence exactly 4 minutes after Target entered REM sleep

(verified via PROJECT PUPPET neural telemetry).

- 0830: Coordinated "Siren Fatigue." Three emergency vehicles were

routed to pass the residence at 10-minute intervals.

- EFFECT: Target exhibited spiked cortisol levels (Heart Rate: 115 BPM)

upon waking.

2.2 (TS//SI) PHASE 2: MIMICRY & ANCHORING

- 1200: Target visited local coffee shop.

- ACTION: Field Agent 4 approached within earshot and repeated a

phrase from the Target's private phone conversation held the previous

night: "The evidence is in the cloud."

- RESULT: Target visibly recoiled and abandoned the location. This

confirms successful "Anchoring"—the Target now believes physical

surveillance is omnipresent.

2.3 (S//NF) PHASE 3: TRAFFIC MOBBING (BRIGHTING)

- 1700: During Target's commute, the "One-Headlight" convoy was

activated. Seven vehicles with a single headlight out were routed to

merge in front of the Target over a 3-mile stretch.

- PSYCHOLOGICAL IMPACT: Target pulled over to the shoulder and began

recording video. This footage will later be used to paint the Target

as "delusional" if released online.

3.0 (TS//SI) NEURAL CORRELATION

Throughout the physical harassment, the PROJECT PUPPET satellite feed

broadcast the "Anxiety Spike" frequency (14.3 Hz) directly to the Target's amygdala.

- OBSERVATION: The external events (street theater) combined with internal

frequency manipulation have successfully shattered the Target's "Reality

Testing" baseline.

4.0 (U) SUMMARY & NEXT STEPS

Target 902-B has been effectively neutralized. They canceled their legal

meeting and are currently barricaded in their residence.

- RECOMMENDATION: Transition to "Silent Treatment" for 48 hours to increase anticipation anxiety.
